

# K106 MARATHON LOW CUT

## Improves stability and protects against injuries - Low cushioning

High compression short socks specific for running, suitable for short, long and medium distance activities. With ankle-arch support with a PATENTED structure that improves motor control and reduces the risk of injury or micro-trauma to the foot joints.

Ventilation panels on the back of the foot to prevent overheating and excessive sweating.

Reinforcements with honeycomb structure shock-absorbing padding that offer superior flexibility and guarantee maximum protection during stance and propulsion.
